

New Vision Display to Present at the 10th China (Shanghai) International Touch Screen Exhibition

Henggang, Shenzhen, May 29, 2013 - New Vision Display, Inc. (“NVD”) is going to showcase its latest technologies and products at the 10th China (Shanghai) International Touch Screen Exhibition, which will be held on June 4th to 6th in Shanghai New International Expo Center. NVD’s booth is A208 & A209 at E4 Pavilion.

NVD’s exhibition will highlight its strong capability in capacitive touch technologies. The product samples on display will cover various touch panel designs using different materials, sensor structures, sizes, controller ICs, ITO patterns and cover lens. Complete LCD display modules with touch panel will be also on display and for customers to experience.

NVD’s products are used in various applications: automotive, medical, industrial, home appliance and consumer electronics. To learn more about NVD and our products, please come and experience the wonder of the technologies at your fingertips!

About New Vision Display New Vision Display is a U.S.-based global leader in innovative, flexible and highly efficient display and touch technology for small and medium-sized applications for industrial, consumer and medical and automotive markets. NVD operates high end manufacturing and design facilities located in China dedicated to display and touch technologies. NVD’s expertise includes display based passive matrix and active matrix liquid crystal display technology, and module integration with touch panels and lens assemblies. NVD is a one-stop solutions partner for display and touch modules and periphery providing full service product design, new product introduction, manufacturing, logistics and local support.
